Input:	220 -240V ~
Globe fitment:	E27
Max. incandescent globe rating:	100W
Waterproof rating:	IP44
Protection class:	I
Stainless steel rating:	304
Mounting position:	Wall mount

SAFETY INSTRUCTIONS

Warning! When using mains-powered equipment, precautions including the following should always be followed to reduce the risk of fire, electrical shock, personal injury and material damage.

Read the whole manual carefully and make sure you read and understand the operating instructions prior to use. Save these instructions for future reference.

GENERAL SAFETY RULES

- Any alterations or additions to building wiring, must be completed by a licensed electrician, or person authorised by legislation to work on the fixed wiring of any electrical installation.
- To prevent electric shock, please ensure that power is disconnected before installing.
- Ensure that the power is cut off when changing light globes. Always remove globes only when they are at room temperature.
- Ensure the lamp holders are free of objects, dust build up, moisture etc. Make sure there are no objects in direct contact with the globes.
- The appliance is not intended for use by children or infirm persons without supervision.
- Children should be supervised to ensure that they do not play with the appliance.
- This unit must be connected to a 220v ~ 240v 50Hz power source.
- Connect unit with incandescent lighting circuits only.
- The lamp must be connected with supply cords greater than 3 x 1.0 mm².
- Outdoor use only!

INSTALLING / REPLACING GLOBES

1. Switch off the light at the mains powerpoint.
2. Use a screw driver to remove two screws and washers that hold the top metal cover to the unit
3. Unscrew the old globe and replace with a E27 incandescent. Maximum incandescent globe rating of 100W.
4. Replace the top metal cover and secure in place by fastening the screws and washers previously removed.

INSTALLATION

Note: It is illegal for persons other than licensed electricians, or persons authorised by legislation to work on fixed wiring of any electrical installation. The following installations steps should only be performed by licensed electricians, or persons authorised by legislation.

STEP 1.

- Position mounting bracket against the wall and mark the positions for the screws.

STEP 2.

- Using a power drill, drill into the wall to provide a suitable mounting for the screws. Care should be taken to avoid drilling or screwing into concealed electrical cables.
- For solid brick walls, we suggest that screws and masonry plugs are used.
- Fix the mounting bracket to the wall, feeding the supply cable through far enough to allow connection.

STEP 3.

- Wire the fitting in accordance with AS/NZS 3000.(see Wiring Instructions)
- Connect the fitting to a 220V - 240V 50Hz power source.
- Check all wiring connections, ensuring all connections have been tightened securely.

STEP 4.

- Ensure wires do not obstruct the mounting screws.
- Attach the fitting to the mounting bracket with the two screws and washers.

WIRING

Note: It is illegal for persons other than licensed electricians, or persons authorised by legislation to work on fixed wiring of any electrical installation. The following wiring steps should only be performed by licensed electricians, or persons authorised by legislation.

1. Remove the six wire retaining screws from the terminal block.
2. Wire according to figure 1, shown to the right.
3. Fasten the six wire retaining screws back to the terminal block ensuring wires are properly secured

CLEANING

- Before cleaning, ensure the light fitting has been switched OFF at the independent wall switch, and allow to cool before commencing.
- Care must be taken while cleaning to avoid scratching the fitting. A soft clamp cloth, or a fine hair brush should be used with a non-abrasive cleaner.
- DO NOT use solvents, or abrasive cleaners on any part of your Stainless Steel Wall Light.

CONTENTS

- 1 x Grilled Wall Light CEWM100A (globe not included).
- 2 x Screws
- 2 x Plastic wall mounting plugs
